Water Quality Report

The Crested Butte South Metropolitan District produces an annual Water Quality Report that summarizes data regarding water sources, detected contaminants, compliance details, and educational information. Water Quality Reports are released annually with information from the previous calendar year. Water Quality Reports for our service area are available on our website: cbsouthmetro.net

Summer Road Maintenance, Construction & Busy Roads

The District has several summer road maintenance projects and new constructions throughout the District. Please expect and be patient with road closures.

The District is experiencing heavy fast paced traffic throughout the subdivision. Please park in designated parking areas and not on the street, obey road signs, and drive with caution.
